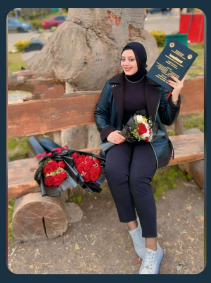
Eman Emad Elkholy

Full Stack Developer (Laravel | React | Next.js | Vue.js | Nuxt.js)

emanemadelkoly@gmail.com 01207995306 Mansoura, Egypt
https://github.com/emanemad-dev https://www.linkedin.com/in/eman-emad/



PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with **hands-on experience building end-to-end, scalable web applications** using Laravel, React, Next.js, and Vue.js. Proficient in **designing robust RESTful APIs, crafting modern and responsive frontends, and ensuring seamless client-server integration**.
Strong foundation in **clean architecture, SOLID principles, and performance optimization**, with a focus on **delivering maintainable, high-quality, and scalable solutions**. Experienced in **integrating third-party services, implementing secure authentication systems, and working effectively in agile development environments**.
Eager to **leverage technical expertise to build impactful products**, enhance user experience, and contribute to **innovative, growth-oriented teams**.

PROFESSIONAL WORK EXPERIENCE

IdaamCloud Software , *Back-End Developer* 05/2024 – Present | Remote, Egypt
Experienced Back-End Developer delivering **robust, scalable, and high-performance Laravel-based systems** for **health and service-oriented platforms** in an **agile, fast-paced environment**. Known for **optimizing backend performance**, **improving code quality**, and **delivering production-ready solutions** that align with business goals.
Professional Highlights:

- **Architected and maintained RESTful APIs** with **Laravel 10**, following **clean architecture, MVC, and SOLID principles**, ensuring **maintainability, scalability, and high reliability**.
- **Led refactoring of legacy systems**, improving **system performance, maintainability, and test coverage**, while reducing **technical debt**.
- **Designed and implemented secure authentication** and **role-based authorization (RBAC)**, including **middleware** for **granular access control** and **audit logging**.
- **Engineered and optimized MySQL databases**, focusing on **complex queries, indexing, normalization**, and **high-traffic data integrity**.
- **Integrated and managed third-party APIs** and **external services**, handling **token-based authentication, rate-limiting, webhooks**, and **real-time data synchronization**.
- **Developed unit and feature tests**, conducted **comprehensive API testing** with **Postman**, and implemented **robust error handling and monitoring** for reliable production systems.
- **Participated in CI/CD pipelines**, performed **peer code reviews**, and enforced **clean coding standards** to maintain **high team productivity and software quality**.
- **Contributed to end-to-end project delivery**, ensuring **solutions are production-ready, scalable**, aligned with **business goals**, and **enhance user experience and system reliability**.
- **Collaborated closely with DevOps, Frontend, Mobile, and UI/UX teams**, ensuring **smooth integration, consistent delivery**, and **alignment of technical and design requirements** across platforms.
- **Mentored junior developers** and promoted **best practices**, improving **team capability, cross-functional collaboration**, and **delivery speed**.

EDUCATION

Bachelor of Engineering, *Mansoura University* 10/2020 – 07/2025 | Mansoura, Egypt
Department of **Computers and Control Systems** – Graduated with **Excellent with Honors**

COURSES

Front-End Development Diploma – Route Academy 09/2025 – 03/2025 | cairo,Egypt
Completed an intensive **Front-End Development training program**, covering **React, JavaScript (ES6+), HTML5, CSS3, and responsive design**.Built multiple real-world projects using **component-based architecture, API integration, and modern UI practices**.

COMPETITIONS & ACHIEVEMENTS

DevFest Mansoura Hackathon 01/11/2023
- Participant, 2024

Software Engineering Competition, IEEE Victoris 2.0 01/11/2022
- 2nd Place, 2023

ECPC Qualifications, Alexandria 01/11/2022
- Qualified Participant. 2023

EXTRACURRICULAR ACTIVITIES

IEEE ManCSC, *Volunteer Back-End Developer*
Participated in developing and maintaining internal tools and platforms for student initiatives.

ICPC Mansoura, *Member*
Practiced advanced problem-solving, algorithms, and participated in local programming contests.

TECHNICAL SKILLS

Back-End — Laravel , PHP, RESTful API Design, MVC, SOLID Principles, Clean Architecture, Authentication & Authorization (RBAC), Unit & Feature Testing, Composer Packages, Background Jobs & Queues, Eloquent ORM, Middleware, Caching, **Third-Party API Integration**, **Filament, Livewire**, **AI Integration**, **Payment Gateways**

Front-End — **React.js, Next.js, Vue.js, Nuxt.js**, **JavaScript (ES6+), TypeScript**, HTML5, CSS3, Sass/SCSS, **Bootstrap, Tailwind CSS**, **Responsive Design, UI/UX Integration**, **Redux / Context API**, **Axios / Fetch API**, AJAX, jQuery, **Component-based Architecture**

Databases — MySQL, **Database Design & Normalization**, **Query Optimization & Indexing**, **Relationships & Joins**, **Migrations & Schema Management**, **Eloquent ORM**, Data Integrity & Performance Tuning

Deployment & DevOps — Git, GitLab, CI/CD Pipelines, Docker, Apache/Nginx, Linux Commands, Server Configuration, Cloud Deployment (AWS / DigitalOcean basics), Environment & Config Management

Tools & Platforms — Postman, Swagger, REST API Testing, VS Code, Agile & Scrum Workflow, Jira, Trello, Slack, Third-Party API Integration, Webhooks, Error Monitoring & Logging (Sentry, Laravel Telescope)

Architecture — MVC, OOP, SOLID Principles, Design Patterns

APIs & Tools — RESTful APIs, Postman, Swagger, Laravel Telescope

Operating Systems & Networking — Linux, Windows, Basic Networking ConceptsVersion

Problem Solving — Data Structures, Algorithms, Competitive Programming

AI Tools — ChatGPT, OpenAI APIs, GitHub Copilot, Cursor, AI-powered Automation, Prompt Engineering, Generative AI Tools, Claud AI Tools

PROJECTS

FreshCart – E-Commerce Platform (Front-End Development) *, Next.js | React | TypeScript | Tailwind CSS | Zustand | React Query 🔗Live Demo: FreshCart (https://freshcart-rose.vercel.app)* 02/2026 – 03/2026

- Developed the **full front-end of a complete e-commerce platform**, including authentication flows, product catalog, cart, wishlist, and checkout experience.
- Built using **Next.js (App Router) and React 19** with **TypeScript**, following **scalable and component-based architecture**.
- Implemented **authentication UI flows** (login, register, password reset, verification) integrated with backend APIs.
- Designed dynamic and responsive **product listing, filtering, search, and product details pages**.
- Managed application state using **Zustand** and handled server state with **React Query** for caching and performance optimization.
- Integrated **RESTful APIs** using Axios, including token handling and error management.
- Developed interactive features like **cart, wishlist, and order flows** with real-time UI updates.
- Built modern, responsive UI using **Tailwind CSS** and enhanced UX with **Framer Motion animations**.
- Applied **performance optimizations** such as debouncing, efficient data fetching, and reusable hooks.

Adasa – Photography Blog Platform (Front-End Development) *, React | Vite | Tailwind CSS | Bootstrap | React Router 🔗 Live Demo: (https://adasa-blog-one.vercel.app)* 02/2025 – 03/2026

- Developed a **modern, responsive photography blog platform** for educational content and gear reviews.
- Built with **React (Hooks) and Vite** for high performance and optimized builds.
- Implemented **search, filtering, and category-based navigation**.
- Designed **interactive blog pages** with table of contents, related articles, and social sharing.
- Created a **mobile-first responsive UI** with smooth UX across devices.
- Applied **modern UI techniques** (animations, glassmorphism, dark theme).
- Supported **RTL and Arabic typography** for better accessibility.
- Used **localStorage** for state persistence and followed **component-based architecture**.

Graduation Project - Fadfadly Mental Wellness Platform *, Built a scalable Laravel RESTful API for Fadfadly, a mental wellness and social engagement platform combining psychological tools, AI sentiment analysis, and interactive features to enhance emotional awareness and self-reflection.* 2025 – 07/2025

Key Contributions:

- Designed a **clean, modular API architecture** using **Laravel 10**
- Integrated **AI-powered emotion analysis** for user-submitted feelings
- Developed **custom psychological tests** with **auto-scoring and dynamic feedback**
- Built **secure profile management**, **habit tracking**, and a full **post system** (text, polls, articles, attachments)
- Integrated **podcast data** using **ListenNotes API** with audio playback and pagination
- Implemented a **unified reaction system** across posts, books, blogs, and comments
- Added **timer functionality** with **start/pause/resume tracking**
- Applied **reusable traits** for **API responses, validation, and error handling**

Tech Stack: Laravel 10, RESTful API, MySQL, Eloquent ORM, Postman, Carbon, **AI APIs**, **ListenNotes API**, GitHub

SOFT SKILLS

- Teamwork & Communication
- Learning Agility & Patience
- Attention to Detail & Creativity
- Collaboration Tools & Agile Workflow
- Problem Solving & Critical Thinking
- Emotional Intelligence & Conflict Resolution
- Mentorship & Knowledge Sharing
- Time Management & Adaptability
- Leadership & Decision Making
- Continuous Improvement & Initiative

LANGUAGES

Arabic **English**
